Empathize&Discover

Date	25 June 2025
Team ID	LTVIP2025TMID32460
Project Name	Traffic Telligence: Advanced Traffic Volume Estimation with Machine Learning
Maximum Marks	4Marks

Empathy Map Canvas:

The Empathy Map Canvas for Traffic Telligence captures a deep understanding of our users—commuters, traffic authorities, and urban planners—by visualizing their behaviors, thoughts, feelings, and challenges related to daily traffic experiences. This tool helps our team empathize with users who face unpredictable traffic delays, inefficient route planning, and lack of real-time updates. By stepping into the users’ shoes, we understand their desire for smooth commutes, smarter city infrastructure, and intelligent traffic management systems. Through this mapping, we uncover key insights that guide the development of a machine learning-powered solution capable of forecasting traffic patterns, dynamically adjusting traffic controls, and providing personalized travel recommendations. This empathy-driven approach ensures that TrafficTelligence delivers practical, user-centered outcomes that truly address the pain points of modern urban mobility
